

## *Bureau Veritas Minerals Announces Relocation of Preparation Laboratory in Managua, Nicaragua*

Managua, Nicaragua – Oct. 23, 2015 – Bureau Veritas Minerals, a global leader in geochemical and assaying laboratories for the exploration and mining industry, today announced that effective immediately, it has relocated its preparation laboratory in Managua, Nicaragua to: Carretera Norte, De Laboratorios Ramos, 1 Cuadra al Norte, 1 Cuadra al Oeste, Barrio la primavera, Managua, Nicaragua.

The new 7,697 square foot location boasts an improved layout and design, two additional machines to meet increased sample capacity, and a new soil preparation room. This new location operates as our offices in Vancouver and USA under ISO 9001:2008 umbrella. Bureau Veritas Minerals will continue to provide support services for the exploration and mining industry in Central America including process sampling for rocks, drill core, drill cutting, and soils.

“Bureau Veritas Minerals is committed to providing a superior level of local service and support to our valued customers in Managua,” said Angelo Karitsiotis, Business Development Director for NANLA (North America & North Latin America) Upstream Minerals. “We are proud to be part of the Managua community and adapt to local market needs as the demand for more diversified minerals testing processes increases.”
