### ***A New Fire Assay Laboratory in Hermosillo***

Bureau Veritas Upstream Minerals is launching a new Fire Assay gold and silver analysis laboratory in Hermosillo Mexico.

This state-of-the-art testing facility will provide support to our sample preparation laboratories in Durango, Hermosillo, Caborca and Chihuahua. While providing expertise and accuracy to the local mineral exploration and mining industry in Mexico, the new laboratory will particularly cater to clients requiring fast and overnight assay service. The Hermosillo laboratory maintains a ISO 9001:2008 registered Quality Management System and is working towards ISO 17025:2005 accreditation with routine participation in globally recognized proficiency test programs (PTP-MAL & Geostats).

- An extensive range of testing capabilities for FA and Au
- More production capacity for the region
- Comprehensive sample system, result and QC data logs
